

- 11 The half-life of the first-order gaseous reaction in which X_2 molecules become converted into X atoms is 30 minutes. 1 mol of X_2 is put into a sealed vessel at pressure p .

What will be true when 75% of X_2 has been converted into X atoms?

- 1 60 minutes have elapsed.
- 2 1.5 mol of X have been formed.
- 3 The total pressure is $7p/4$ (at constant temperature).

A 1, 2 and 3 **B** 1 and 2 only **C** 1 only **D** 2 and 3 only
