

2 *Use of the Data Booklet is relevant to this question.*

This question concerns the atoms of elements with atomic numbers 3 to 12 (Li to Mg) in the Periodic Table.

For the most common isotopes, the nucleon number is the closest whole number to its relative atomic mass.

Which statements are correct for at least one of the most common isotopes of these elements?

- 1 number of neutrons > number of protons
- 2 number of neutrons = number of protons
- 3 number of neutrons < number of protons

A 1, 2 and 3 **B** 1 and 2 only **C** 2 and 3 only **D** 2 only
