

- 2 The electronegativity values of three unidentified elements X, Y and Z are $X = 1.2$, $Y = 0.9$ and $Z = 1.8$.

The electronegativity values of oxygen and chlorine are $O = 3.5$ and $Cl = 3.0$.

In which pair does the first compound have greater ionic character than the second compound?

- A XCl_2 and Y_2O
- B XO and Y_2O
- C YCl and ZO_2
- D ZCl_4 and XCl_2
