

- 26 3-bromo-4-hydroxycinnamic acid is dissolved in heavy water, D_2O . It contains a number of hydrogen atoms which can be replaced by deuterium, D.

3-bromo-4-hydroxycinnamic acid

What is the maximum number of hydrogen atoms which could be replaced by deuterium atoms in each molecule of 3-bromo-4-hydroxycinnamic acid?

A 1

B 2

C 4

D 5
