

29 Which statements about the standard hydrogen electrode are correct?

- 1 When a standard hydrogen electrode is connected to a half-cell with a negative standard electrode potential, hydrogen gas is made.
- 2 The standard redox potential of the standard hydrogen electrode is 1.00 V.
- 3 The standard hydrogen electrode contains dilute sulfuric acid with a concentration of 1.00 mol dm^{-3} .

A 1 and 3

B 1 only

C 2 and 3

D 2 only
