

- 19** An unknown organic compound is tested with warm silver nitrate solution. No visible result is seen after one hour. Two students see the experiment and each make a comment.

student P This compound is definitely a halogenoarene, but it is not possible to state which halogen is present.

student Q This compound is definitely not a halogenoalkane.

Which students are correct?

	student P	student Q
A	✓	✗
B	✗	✓
C	✓	✓
D	✗	✗

key

✓ = correct

✗ = not correct
