

12 The following reactions at 298 K, form an energy cycle.

Which description of one of the enthalpy changes is correct?

- A** ΔH_1 is $\Delta H^\circ_{\text{combustion}}$ of $\text{C}_6\text{H}_{12}(\text{l})$.
- B** ΔH_2 is $\Delta H^\circ_{\text{formation}}$ of $\text{C}_6\text{H}_{12}(\text{l})$.
- C** ΔH_3 is $6 \times \Delta H^\circ_{\text{atomisation}}$ of $\text{H}_2(\text{g})$.
- D** ΔH_4 is $6 \times (\Delta H^\circ_{\text{formation}}$ of $\text{CO}_2(\text{g}) + \Delta H^\circ_{\text{formation}}$ of $\text{H}_2\text{O}(\text{g})$).
