

- 14 The graph shows how the initial rate of reaction varies for an enzyme catalysed reaction as the substrate concentration changes.

Which statements correctly describe the situation when [substrate] = x?

- 1 The initial rate of reaction is affected by increasing [substrate].
- 2 The order of reaction with respect to [substrate] is 1.
- 3 There are no more enzyme active sites available.

**A** 1 and 3      **B** 1 only      **C** 2 only      **D** 3 only
