

19 β -selinene, $C_{15}H_{24}$, can be isolated from plant material.

β -selinene

When β -selinene reacts completely with HBr, the product mixture contains different compounds, all with the same molecular formula.

Optical isomers should **not** be considered when answering this question.

Which row identifies the molecular formula of the products and the number of these products that are tertiary bromoalkanes?

	molecular formula of the products	number of products that are tertiary bromoalkanes
A	$C_{15}H_{24}Br_2$	2
B	$C_{15}H_{24}Br_2$	3
C	$C_{15}H_{26}Br_2$	2
D	$C_{15}H_{26}Br_2$	3
