

2 Which statements about the bond energy of single covalent bonds are always correct?

- 1 A longer covalent bond results in a greater bond energy.
- 2 A larger nuclear charge on the bonded atoms results in a greater bond energy.
- 3 A greater attraction between the shared pair of electrons and the nuclei of the bonded atoms results in a greater bond energy.

A 1 and 3

B 1 only

C 2 and 3

D 3 only
