

18 A complex of copper is formed in aqueous solution.

What is a correct pairing of a possible formula for the complex with a description of its physical state?

	formula	description
A	$[\text{Cu}(\text{NH}_3)_4(\text{H}_2\text{O})_2]^{2+}\text{SO}_4^{2-}$	dark blue solution
B	$[\text{Cu}(\text{NH}_3)_6]^{2+}\text{SO}_4^{2-}$	dark blue precipitate
C	$\text{Cu}(\text{OH})_2(\text{H}_2\text{O})_4$	pale blue solution
D	$[\text{Cu}(\text{H}_2\text{O})_6]^+\text{Cl}^-$	pale blue solution
