

- 13 The reaction between sulfur dioxide and oxygen is reversible.

2.00 mol of sulfur dioxide and 2.00 mol of oxygen are placed in a vessel of volume 0.500 dm^3 and allowed to reach equilibrium.

At equilibrium, 1.80 mol of sulfur trioxide is present.

What is the value of K_c for this reaction under the conditions used?

- A** 4.09 **B** 36.8 **C** 73.6 **D** 203

- 14 A hydrogencarbonate buffer solution is used to maintain an almost constant pH in blood. The
