

- 14** A hydrogencarbonate buffer solution is used to maintain an almost constant pH in blood. The equilibrium that applies to this buffer solution is shown.

The pH of blood should be maintained at a value of 7.4.

Which $\frac{[\text{H}_2\text{CO}_3]}{[\text{HCO}_3^-]}$ ratio gives a pH of 7.4 at 37°C ?

- A** 3.4×10^{-5} **B** 1.6×10^{-4} **C** 6.3×10^3 **D** 3.0×10^4

- 15** An excess of silver chloride is added to water and the mixture is shaken until equilibrium is
