

- 16 An excess of silver sulfate, $\text{Ag}_2\text{SO}_4(\text{s})$, is shaken with water. At equilibrium, the silver ion concentration in the solution formed is $0.032 \text{ mol dm}^{-3}$.

What is the silver ion concentration when an excess of $\text{Ag}_2\text{SO}_4(\text{s})$ is shaken with $0.50 \text{ mol dm}^{-3} \text{ Na}_2\text{SO}_4$?

- A $3.3 \times 10^{-5} \text{ mol dm}^{-3}$
- B $6.6 \times 10^{-5} \text{ mol dm}^{-3}$
- C $5.7 \times 10^{-3} \text{ mol dm}^{-3}$
- D $8.1 \times 10^{-3} \text{ mol dm}^{-3}$
- 17 Which reaction steps result in the formation of a carbocation?
