

- 18** The drug ibuprofen has two enantiomers. One enantiomer has the desired pharmacological activity whilst the other is inactive.

Which statements give correct reasons for this difference?

- 1 The biological receptors that the drug bonds with are chiral.
- 2 The enantiomers are structural isomers with different chemical properties.
- 3 The enantiomers have many different physical properties.

A 1, 2 and 3 **B** 1 and 2 only **C** 1 only **D** 2 and 3 only

- 19** Allyl alcohol, $\text{CH}_2=\text{CHCH}_2\text{OH}$, can be converted into propanal by using a catalyst containing a
